

BF600

Final Bacteria Filter

BF600 inline oxygen final bacteria filter is used in conjunction with BiPAP, Ventilator, and Oxygen concentrator machines. Filter provides an added layer of filtration to protect patients from bacterial and viral particles. The efficiency of this HEPA filter helps to purify the air that patients breathe.

- Economical replacement to OEM
- Excellent price
- Connections:
 - ◇ In: 1/8" stepped barb & 1/4" straight barb
 - ◇ Out: 1/8" stepped barb & 1/4" straight barb
